SKILLS

Languages: C++, C, Java, JavaScript, Python.
Tools/Technologies: ReactJS, NodeJS, MongoDB, Express.js, Mongoose, VS Code, GitHub, Flutter, Kotlin, SQL.
Soft Skills: Problem-Solving, Teamwork, Time Management, Adaptability, Quick Learner.

PROJECTS

Nuno - Real Time Multiplayer Card Game | [GitHub](#) | [Live Demo](#) Aug' 2026

- Developed a real-time game server with rooms, matchmaking, and support for up to 8 players per table.
- Enforced server-side validation for turn order, card legality, and 108-card deck integrity to prevent forged moves.
- Configured a rules engine supporting official rules and six optional house-rule variants for private rooms.
- Enabled matchmaking through rating-based queues and private rooms using share codes or friend invites.
- Deployed a player ranking system with level progression and rank comparison for tracking player performance.

Tech used – Node.js, TypeScript, Express.js, PostgreSQL, Flutter, Render.

AI Debate Coach | [GitHub](#) | [Live Demo](#) Apr' 2026

- Engineered a 3D AI debate platform with a live React Three Fiber arena for AI-powered debate practice.
- Implemented argument generation and counter-argument building for interactive debate sessions.
- Established a feedback scorecard measuring clarity, logic, evidence, and impact of arguments.
- Integrated Gemini and Groq AI models with a Node.js/Express backend for AI responses.
- Coordinated with two teammates while handling AI integration and backend development.

Tech used – React, Three.js, Node.js, Express.js, Gemini API, Groq API.

News Pinch | [GitHub](#) | [Live Demo](#) Mar' 2026

- Created an Android news application supporting articles, polls, and video-based posts.
- Structured a simple content model for efficient article, poll, and video publishing.
- Facilitated user and administrator contributions for managing application content.
- Connected YouTube links to support video content without using an external news API.
- Streamlined news publishing through a lightweight and user-friendly Android interface.

Tech used – Kotlin, Android.

TRAINING

Data Structures Fundamentals: Basic to Applications | [LPU](#) Jun' 2026 – Jul' 2026

- Completed structured training in fundamental data structures and their practical applications.
- Strengthened understanding of arrays, strings, linked lists, stacks, and queues.
- Improved problem-solving skills through coding exercises and DSA-based problems.
- Applied data structures to develop efficient solutions for programming problems.

Tech Stack–C++, Data Structure and Algorithm.

CERTIFICATES

Oracle Cloud Infrastructure Certified AI Foundations Associate Oracle	Jul' 2026
Programming in JAVA IamNeo	May' 2026
Programming Using C++ Infosys	Aug' 2025
Fundamentals of Software Testing SkillEra	Nov' 2024
Effective Communication Skills SkillEra	Oct' 2024

ACHIEVEMENTS

Solved 200+ problems across LeetCode and GeeksforGeeks.	Aug' 2024 – Present
Awarded 4-Star Python Programming Badge on HackerRank for coding performance.	Aug' 2024 – Present

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.52	Aug' 2024 – Present
Kunwar Public School	Jaunpur, Uttar Pradesh
Intermediate; Percentage:76%	Apr' 2023 – Mar' 2024
